Beginning inventory: \$

Ending inventory				\$

INVENTORY CONTROL SHEET INSTRUCTIONS

The value of the beginning inventory is determined by taking a physical count before the food service operation begins. The value of the beginning inventory thereafter is the same as the ending inventory for the previous month.

A complete physical inventory of all purchased foods, commodities, and supplies on hand must be taken at the end of the reporting period.

For ease in taking a physical count of foods in storage, arrange the items according to food groups in the storage area and arrange each group in alphabetical order, for example, canned fruits and fruit juices - apples, apricots, etc. Store food in cases, boxes, or other containers marked with the date received and cost per unit to facilitate the taking of inventories.

- Column 1. Enter the name of the food item, such as corn, green beans, or mayonnaise.

- Column 2. Enter the size pack, such as, 6/#10 case, #50 bag, or #10 can. If different size containers of the same food item are on hand, use a separate line for each size and a separate line for each different unit cost of the same size pack.

- Column 3. Enter the number of units (of the size shown in column 2) found on hand from actual count.

- Column 4. Enter the unit cost for the size unit shown in column 2 (use the unit cost written on package or unit). Use invoices to determine the unit cost per item and total food purchases for the reporting period.

- Column 5. Obtain the total cost by multiplying the number of units (column 3) by the unit cost (column 4) and enter in column 5. Add column 5 (total cost) on all pages for the inventory at the end of the month. This total is the value of the ending inventory.

This is a permanent source document and must be retained for a period of 3 years following the date of submission of the final claim for reimbursement for the fiscal year.

Instructions for Meal Count Form – Daily

Each day, a site must take a point of service meal count. This form may be used for the daily meal count.

- Line 1 equals the total meals available. That number equals the number of meals received or prepared plus the number of meals available from the previous day.
- Line 2 equals the total number of first meals served to children. Cross out each number, as a child receives a meal. Include any teenagers, 18 and under, paid or unpaid, who are helping out at the site. (If more than 150 children are served at the site, use the optional second page. For sites needing the second page, we suggest printing this form front to back.)
- Line 3 equals the total number of second meals served to children. (Remember, reimbursable meals are limited to no more than 2 percent of the total number of first meals served.)
- Line 4 equals the total number of meals served to Program adults. “Program adults” are adults who work directly as part of the operation of the food service. This includes all adults who prepare meals, serve meals, clean up, or supervise the children. This does not include teenagers, 18 and under, who may perform these tasks at the site. Meals for children 18 and under are fully reimbursable, and you would count these meals in Line 2.
- Line 5 equals the total number of meals served to non-Program adults. “Non-Program adults” are adults who are not directly involved in the operation of the food service. Non-Program adults include any sponsor administrative staff, such as monitors or sponsor directors, or State or Federal reviewers.
- Line 6 equals the total number of meals served, which is the sum of Lines 1 – 5.
- Line 7 equals the total number of meals that are unusable because they are damaged, incomplete, or otherwise non-reimbursable.
- Line 8 equals the total number of leftover meals, which is calculated by subtracting Line 6 from Line 1.
- Line 9 equals the sum of Lines 6, 7, and 8. It accounts for all meals and should equal Line 1.
- Use the line at the bottom of the form to record the number of children requesting a (first) meal after all available meals were served. This information is helpful in adjusting meal orders upward.
- The site supervisor must sign and date the meal count form.
